

# Crabtree

Spring 2017 titles aligned to Common Core State Standards

Crabtree offers a comprehensive range of high-quality fiction and non-fiction texts to help students develop a deep and meaningful understanding of core content.

Also Available As  
**ebooks**

Series supports NGSS: Engineering Design 3-5  
(ETS1-1, ETS1-2, ETS1-3)

Well-crafted text helps readers identify important connections (sequence, cause/effect) (RI 3.3, RI 3.8)

## Creating a Model

Once an engineer has decided on the type of dam, he or she will create a model of it. A model is a **representation** of a real object. Some models look and work the same as the real object, but are much smaller. A model helps the team building the real dam understand the engineer's design.

Academic and domain-specific vocabulary is introduced and reinforced throughout the text (RI 3.4)

## Testing and Improving

Engineers also use their model to test the design of the dam. The model helps them learn if the dam is strong enough to support the amount of water **pressure** from the river, and whether it can stand up to severe storms. After the first test, engineers record the results and then make improvements to the model. They repeat this process until the design works safely and effectively.

Testing a model will tell engineers if there are areas in their design that need fixing or improving.

Dynamic images support key concepts and enhance comprehension (RI 3.7)
