**What is Interest Level (IL)?**

Renaissance Learning® uses Interest Levels to help indicate the appropriateness of a book's content. The Interest Level reflects the judgment of the book's publisher and the professionals at Renaissance Learning. However, the final decision on whether a book is appropriate for a particular student is the responsibility of school librarians, teachers, and parents.

**INTEREST LEVELS**

- LG = Lower Grades (K-3)
- MG = Middle Grades (4-8)
- MG+ = Upper Middle Grades (6 and up)
- UG = Upper Grades (9-12)

**What is ATOS® Book Level (BL)?**

ATOS Book Levels are reported using the ATOS readability formula and represent the difficulty of the text. For example, a book level of 4.5 means the text could likely be read independently by a student whose reading skills are at the level of a typical fourth grader during the fifth month of school. (Of course the content may or may not be appropriate for a fourth grader which is why we also use Interest Levels.)

**Crabtree's Note About Readability Formulas**

Educators have reported dissatisfaction with readability formulas for non-fiction books. Non-fiction books tend to be graded higher than usual by these formulas due to difficult or technical terminology which may already be explained within the text or in the glossary of the book.

**The Lexile® Framework for Reading**

Lexile measure is now provided for books at the K-2 level to allow for a greater differentiation at the beginner level. Our previously Lexiled materials have been updated to meet the new Lexile framework. Visit [Lexile.com/beginning-readers](http://Lexile.com/beginning-readers) for more information.

METAMETRICS®, the METAMETRICS® logo and tagline, LEXILE®, LEXILE® FRAMEWORK, LEXILE ANALYZER®, LEXILE ANALYZER® EDITOR ASSISTANT™, LEXILE TITLES DATABASE™, LEXILE CAREER DATABASE™, LEXILE GROWTH PLANNER™, the LEXILE® logo, POWERV™, QUANTILE®, QUANTILE® FRAMEWORK, QUANTILE GROWTH PLANNER™, MATH@HOME® and the QUANTILE® logo are trademarks of MetaMetrics, Inc., and are registered in the United States and abroad.

Crabtree has over 2,000 titles leveled using the Lexile Framework for Reading! Just as all of our new products have ATOS® and Guided Reading Levels, Lexile levels have also been added to enable you to make better informed purchasing decisions.

**What is a Lexile® measure?**

A Lexile measure represents the complexity of a text, such as a book or article. Lexile measures are expressed as numeric measures followed by an "L" (for example, 850L), and are placed on the Lexile scale. The Lexile scale is a developmental scale for measuring reader ability and text complexity, ranging from below 200L for beginning readers and beginning-reader materials to above 1600L for advanced readers and materials.

**LEXILE TEXT RANGES TO GUIDE READING FOR COLLEGE AND CAREER READINESS**

9-10	1050L-1335L

**GUIDED READING LEVELS**

in accordance with Fountas and Pinnell

Crabtree titles are leveled for guided reading instruction in accordance with the work of literacy experts Irene Fountas and Gay Su Pinnell. The chart shown left will help you guide students to the appropriate levels of books and promote their success as readers.
