

# War Machines

War Machines is a series of illustrated books that gives a brief history of the awe-inspiring vehicles, weapons, and devices that have been developed for warfare.

Specifications:  
**Ages 10-14+**  
 32 pages, 8½ x 11", full colour  
**\$9.95 PAP**

## Combat Helicopters by David West

From the first observation and medical helicopters of World War Two and the Korean War to the Air Cavalry of Vietnam and the missile-armed attack helicopters of today's armies, twelve dioramic scenes reveal how helicopters have introduced a new dynamic into the way warfare is waged.

ISBN 978-0-7787-6679-7 PAP

## Combat Planes by David West

From the wood and canvas biplanes of World War One to the latest vertical takeoff stealth fighters and pilotless drones of the world's air forces, twelve dioramic scenes reveal how combat aircraft have gradually become the sophisticated stealth machines of today.

ISBN 978-0-7787-6680-3 PAP

## Rockets and Missiles by David West

From the first rockets used to fire arrows to modern computer-controlled cruise missiles and wire-guided High Explosive Anti-Tank Missiles, twelve dioramic scenes reveal how rockets and missiles have gradually become the primary weapons of mechanized warfare.

ISBN 978-0-7787-6682-7 PAP

## Submarines by David West

From the early human-powered submarines of the American Civil War to the U-boats of both world wars and the modern nuclear-powered missile platforms of the Cold War, twelve dioramic scenes reveal how submarines have become one of the most dangerous weapons of war.

ISBN 978-0-7787-6683-4 PAP

## Tanks by David West

From the Mark I to the powerful turreted tanks of World War Two and the modern missile-firing, troop-carrying light tanks of today's armies, twelve dioramic scenes reveal how the invention of the tank during World War One changed the face of warfare forever.

ISBN 978-0-7787-6684-1 PAP

## Warships by David West

In twelve dioramic scenes, discover how warships have changed from the sail and oar power of ancient Greek triremes and 19th century ships of the line to iron warships of the early 20th century and today's modern aircraft carriers and stealth missile destroyers.

ISBN 978-0-7787-6685-8 PAP

### From Combat Helicopters

## Military Helicopters

Helicopters are used by armies, navies, and air forces around the world. During **World War II** (1939-45), they had an important role in search and rescue operations. They were also used in observation and spotting. Later, during the **Korean War** (1950-53), helicopters carried wounded soldiers from the battlefield to field hospitals. It wasn't until the **Vietnam War** (1955-75) that helicopters changed how war was fought. During this conflict, helicopters were designed for special roles. They carried heavy guns to remote places. Some were made specifically for attacking tanks.

Here, two Russian Kamov Ka-52 attack helicopters are on patrol. The pilot and copilot sit side by side in these. This is an unusual arrangement for attack helicopters.

Today, military forces use helicopters for multiple roles, including traditional observation and targeting. They are important for quick troop transport and medical evacuation (medevac). Helicopters also provide close air support (CAS) by attacking enemy troops. They are even important in anti-submarine warfare. Military technology has become so advanced that drone helicopters are now standard for observation as well as bombing missions.
